

Keep Your Business Safe and Sound

Protect your data and your company with computer and network security that reduces your risk and protects your reputation. Convergent Technologies Group can evaluate your vulnerabilities and design a custom security plan.

Your business isn't fully protected from cybercrime without the right tools, technologies and protocols in place. CTG has the technology and expertise to evaluate your risk and deploy a security solution that delivers end-to-end protection.

We tailor security solutions to your needs and compliance demands. We understand the impact of a breach and leverage our expertise to prevent unwanted exploitation of your business.

END-TO-END BUSINESS PROTECTION

Today, more risks come from more sources, and CTG is uniquely positioned to mitigate these cyber threats. We know how to protect your business from vulnerabilities associated with phishing schemes, malware, viruses, ransomware and hackers looking to breach your security and cripple business operations.

DEEP SECURITY EXPERTISE

Our network engineers hold top industry certifications and are among the best in their field. By expertly deploying pre-approved vulnerability tests, our team exposes security gaps that put your business at risk then recommends and implements the right solution for you.

CUTTING-EDGE SOLUTIONS

We rely on a portfolio of enterprise security software and solutions from industry leaders, including Hewlett Packard Enterprise, to identify and mitigate tomorrow's threats today. We leverage the latest security expertise and world-class security intelligence products to identify and neutralize threats.
